Performance data includes back-test results prior to December 01, 2022

An index comprised of primarily U.S. exchange listed, large and mid-capitalization stocks and, when dictated by Pinnacle Dynamic Funds' market risk algorithms, treasury bond instruments. The overall asset allocation is determined by Pinnacle's proprietary stock selection and market risk models/signals, seeking to deliver better-than-index returns over a 24-36 month rolling period.

The Case for the Pinnacle Focused Opportunities Index

- Full Focused Equity Participation During Normal Market Conditions** - Pinnacle's proprietary stock selection model identifies the top 30 equity selections monthly from the universe of ranked stocks by scoring a combination of the following factors: (1) Momentum (2) Relative Strength (3) Positive Earnings Revision.
- Participate and Protect During Higher Risk Market Conditions** - If one of Pinnacle's market risk algorithms is negative, the index will be positioned in 75% stocks and 25% U.S. Treasury bond ETF's. If both of Pinnacle's market risk algorithms are negative, the index will be positioned in 50% stocks and 50% U.S. Treasury bond ETF's.
- Concentrated, Rules-Based Process** - The index utilizes a quantitatively driven, concentrated, rules-based approach to deliver replicable, risk managed, equity index outperformance over time.
